P.T INTEGRATED SCIENCE MID - TERM II EXAMINATION - 2024

WRITE CRITICAL THINKING AND REASONING ACTUAL LEARNING WITH THE ACTIVITY BOOKS, MAPS, 10'S GUIDE'S AND PRACTICE COMBINATIONS.

10. Name the accident caused by shortage of oxygenated blood supply to the brain.

11. Mention any one example of a layer that makes up the soil profile.

12. How is the amount of water vapour in the atmosphere measured at a weather station?

13. State any one use of soap in the cleaning of clothes.

14. Name any one material used in the making of charcoal briquettes at home.

15. Mention any one sign that helps a goat farmer to know that her nanny goat is ready for mating.

16. State any one way lungs are suited for breathing in people.

17. Give one way of keeping one's beddings clean after use.

18. Mention any one way biological changes are important to living things.

The diagram below is of two bricks being pulled by two different people. Study and use it to answer questions 19 and 20.

19. Who of the two people above uses a lot of effort to pull the brick?

20. Give a reason to support your answer in number (19) above.

33. State any **one** activity in the wet season done to reduce competition for soil nutrients among crops in a school garden.

34. Mention any **one** soil pollutant controlled through recycling wastes.

The diagram below is of part of the human ear. Study and use it to

answer questions 35 and 36

35. Name the part of the ear marked with letter Y.

36. How is part marked with letter N useful to a person walking along the road?

37. State the main reason why the handle of an iron box is usually made of

wood.

38. Why do children in young farmer's club prefer rearing exotic rabbits to local breeds of rabbits?

39. Why are plants grouped under renewable resources?

40. State any **one** advantage of growing perennial crops.

21. How is wringing an important step in the process of cleaning of clothes?

22. State the main reason why ready crops are harvested in dry seasons.

23. Mention any one way livestock farmers harm cattle on grazing fields.

24. Name the immunisable disease which affects the brain.

25. How is reproduction in mushrooms similar to that in ferns?

26. Give one way of controlling the dangers of alcoholism among school going children.

27. Name the method used to separate the different fuels in crude oil.

28. How are carrots different from cassava in the way they are propagated?

29. Apart from the use of hooks, give one other way plants with weak stems climb others.

30. How do blood platelets prevent entry of germs into the body when one gets a cut on the skin?

31. Mention any one activity a school child can do to promote oral hygiene.

32. Calculate the Mechanical Advantage of a wheelbarrow used to carry a load of 1200N using an effort of 400N.

# SECTION B: 60 MARKS

Questions 41 to 55 carry four marks each.

41. a) Name the types of soil that have the following properties:

- i) large and rough particles
- ii) moderately sized particles and spaces
- b) Mention the natural fertilizers obtained from house hold refuse like leftover food and peelings.

c) Apart from applying manure, give one other way of improving soil fertility.

42. a) Give any two ways dysentery spreads among people.

- i)
- ii)
- b) How does untreated dysentery lead to dehydration in babies?

c) State any one way the spread of dysentery can be controlled in a home.

43. a) Mention any two examples of useful bacteria.

- i)
- ii)
- b) State any one danger of bacteria to crop farmers.

c) Give one way livestock farmers control the harmful effects of bacteria in their milk products.

44. The diagram below is of a simple electric bell. Study and use it to answer the questions that follow.

a) Name the parts labelled with letters N and M.

(i) N

(ii) M

b) How is part labelled with letter K useful in the functioning of the bell?

c) Briefly explain what happens to part L when part N is pressed.

45. a) Give the method of obtaining coal from the ground.

b) State any two ways coal can be used as an energy resource.

(i)

(ii)

c) Apart from coal, name one other example of a fossil fuel.

46. a) Name the two main layers of the skin.

(i)

(ii)

b) Give one way the skin regulates body temperature on a cold day.

c) Name the skin disease which causes loss of hair and red round patches on the skin.

47. a) Name the type of pulley system which gives a mechanical advantage of one.

b) How does the above named pulley system simplify work?

c) Mention any two uses of pulleys in our daily life.

48. a) Briefly explain what happens to the lungs and diaphragm when one breathes in.

i) lungs

ii) diaphragm

b) Apart from the presence of cilia, mention two other ways the nose is adapted to its function during breathing.

i)

ii)

49. The diagrams below are of methods of heat transfer. Study and use them to answer the questions that follow.

a) Identify the methods of heat transfer labelled with letters Q and P.

(i) Q

(ii) P

b) Name the hygienic activity that requires the use of the method of heat transfer marked with letter P.

c) Why does the method of heat transfer marked Q occur in liquids and gases?

Select from the table the correct meaning of terms and write it in the space provided below:

M: terms	N: their meaning
mass	amount of space occupied by an object
weight	gravitational force exerted on an object
volume	amount of matter a body contains
density	

52. In the table below, part M shows the terms used in the study of measurements and part N shows their meaning in a wrong order.

- i) BCG vaccine  
ii) Hepatitis B

b) Mention the body sites where the following vaccines are administered in

51. a) Name two examples of vaccines administered against Tetanus.

c) How does the use of insecticides control insect vectors in a home?

b) State the way a mosquito and a cockroach spread diseases;

50. a) How is the lifecycle of a mosquito different from that of a cockroach?

53. a) State the role of each of the following parts on a caged hutch;

i) wiremesh

ii) a roof

b) Mention any two exotic breeds of rabbits commonly kept in Uganda.

i)

ii)

54. The diagrams below are of equipment used on a livestock farm. Study

and use them to answer the questions that follow.

a) Name the above equipment used on a livestock farm:

i) X

ii) Y

b) Write any one cattle disease controlled with the help of the equipment

marked with letter Y.

c) How does the use of the equipment X control inbreeding on a livestock farm?

55. a) State any two structural differences between arteries and veins.

i)

ii)

b) Apart from blood vessels, write the two other main components of the

circulatory system.

i)

ii)
