SECTION B (60 MARKS)

41. a) Which crop growing practice is carried out by each garden tool named below.

i) Garden trowel

ii) Rake

iii) Sickle

iv) Secateurs

42. a) An object is placed 20cm in front of a plane mirror.

i) How far will its image be formed behind the mirror?

ii) Give a reason to support your answer in part (a) above.

b) State any one device that uses plane mirrors.

c) Why can't plane mirrors be used to make driving mirrors?

43. Complete the table below correctly.

Body organ	Harmone	Function
	Testosterone	Production of sperm cells.
kidney	Antidiuretic hormone	_____
ovary	_____	Controls development of secondary characteristics in females
_____	insulin	Regulates blood sugars to be converted to glycogen by the liver

44. Below are two soft iron of the same size and length to be magnetized. Use it to answer questions that follow.

b) A) Which of the two soft iron will produce a stronger electro magnetization when currant of the same voltage is passed through them?

b) State the reason for your answer in part (a) above.

c) Why are soft iron commonly used to make electromagnet?

45. a) What is ECOSAN in full?

b) Of what advantage is a VIP latrine over a conventional larine?

d) Mention any two diseases whose spread is controlled by using latrines properly.

i) _____

ii) _____

46. a) Which deficiency disease is characterized with.

i) potbelly and face like that of an old person.

ii) swollen belly and swollen lower limbs.

b) Name the deficiency disease that can be prevented by feeding on carrots and red pepper.

c) Which human body system is affected by lack of Vitamin D in children's diet?

47. a) Which method of separating mixtures involves use of a funnel?

b) How is a mixture of immiscible liquids separated?

c) State the name given to a uniform mixture.

d) Mention any one example of substance that forms a uniform mixture with water.

48. a) State any two health conditions that force a mother to use bottle feeding.

(i) _____

(ii) _____

b) What problems are likely to be faced by a child who is only bottle fed?

c) Why are mothers who are HIV positive advised to apply exclusive feeding of their babies?

Study the diagram below about a plant process that takes place in leaves and use it to answer questions 49.

49. a) Which plant process is illustrated above?

b) Why does the above named process in part (a) take place in leaves?

c) How does the illustrated process depend on the sun?

e) Which kind of plants control the above process by shedding all their leaves during the dry season?

50. a) Which characteristic makes mammals different from all other vertebrates?

b) Name the group of cold blooded vertebrates whose mode of reproduction is similar to that of mammals.

c) In what way is each group of mammals named below similar to birds?

i) chiroptera

ii) Monotremes

51. a) Which internal body is affected by fainting?

b) What does fainting indicate?

c) State any two ways one can safe guard him/her from fainting.

(i) _____

(ii) _____

52. a) Name the vaccine that can be referred to as a triple vaccine.

b) Why are vaccine administered using different body sites?

c) Give the reasons why measles vaccine cannot be administered to children at birth.

e) Under which conditions are vaccines safely transported to immunization centres?

53. a) Which type of cattle disease is controlled by dipping cattle in acaricides?

b) Apart from dipping cattle how else can the spread of cattle diseases be controlled?

c) State any two effects of diseases to cattle.

(i) _____

(ii) _____

54. a) What term is given to each group of organisms in the food chain?

I) Bacteria _____

ii) Plants _____

iii) Herbivores _____

b) How are carnivores depend on herbivores in the food chain?

55. a) Give the meaning of the following terms as used in drugs.

i) Drug prescription

ii) drug misuse

b) State any one way people misuse drugs.

C) In which one way is drug misuse dangerous?

- E N D -
