Osega sat in one corner of the classroom and started writing his application letter. He read it over and over. He put it in his bag and went out of the classroom. He walked towards the staffroom but stopped on the way. He did not have the confidence to hand in his letter to Mr. Alela though he wanted to become a head prefect. He was afraid of addressing large numbers of pupils. So, he gave up and joined his friends to play in the field.

As he played, he accidentally dropped his letter. His friend Matega picked it and read it. He became so excited that he took it to Mr. Alela. Mr. Alela put the letter on his table after reading it. At the assembly the following day, Mr. Alela read the names of all the contestants. Osega was surprised to hear his name. He trembled a little. The time had come now. He had to address the pupils during the general campaigns on Friday. Luckily, Matega, his friend, was there to help. He wrote a speech for him to read during the general campaigns.

Osega practised the speech before he could be called upon to address the pupils. When his time came, he spoke very well and confidently. All the pupils got excited. His speech was the best of all contestants. The pupils promised to elect him as their head prefect. To date, Osega is the head prefect of his school.

- (a) Find the fraction of the land he uses for growing simsim. (3marks)

Land for growing cassava

$\frac{2}{5}$

$\frac{1}{5} \times \frac{3}{5}$

beans

$\frac{1}{5}$

1/5 of the remainder

Remainder

$1 - \frac{2}{5} = \frac{5-2}{5} = \frac{3}{5}$

$\frac{2}{5} + \frac{1}{5} = \frac{2+1}{5} = \frac{3}{5}$

Fraction for simsim

$1 - \frac{3}{5}$

$\frac{5}{5} - \frac{3}{5} = \frac{5-3}{5} = \frac{2}{5}$

- (b) If his total land size is 150 hectares, how many hectares does he use for growing beans? (2marks)
