Foundational Behaviour Overview 2024

Safety has the highest proportion of institutes/meetings (**74%**) where most participants exhibited this behavior.

Engagement and **Self-Esteem** followed with slightly similar exhibition levels. **Critical Thinking** was the least exhibited, with only **42%** of all institutes/ meetings.

Percentage Distribution of Behaviors Across Activities in 2024

SEL Institute and **Network Meetings** are activities where all behaviors, particularly in **Engagement**, **Safety**, and **Self Esteem** were evenly indicated, with percentages consistently above 60%.

Classroom Observations showcase high levels of safety **81%** but need improvement in fostering curiosity and self-esteem **26%**.

Safety and **Self Esteem** are consistently strong across activities, indicating a solid foundation to for improvement on while improving weaker behaviors like **Curiosity & Critical Thinking**.

The numbers presented below reflect entries of a single activity being entered multiple times. The benefit to this is that these numbers allow for a comprehensive and nuanced presentation of how participants practiced the entire data submission process in different activities which allows for cascading of knowledge further to school level
